

Manufacturing Services

LASER CUTTING, CNC ROUTER, HYDRAULIC PRESS

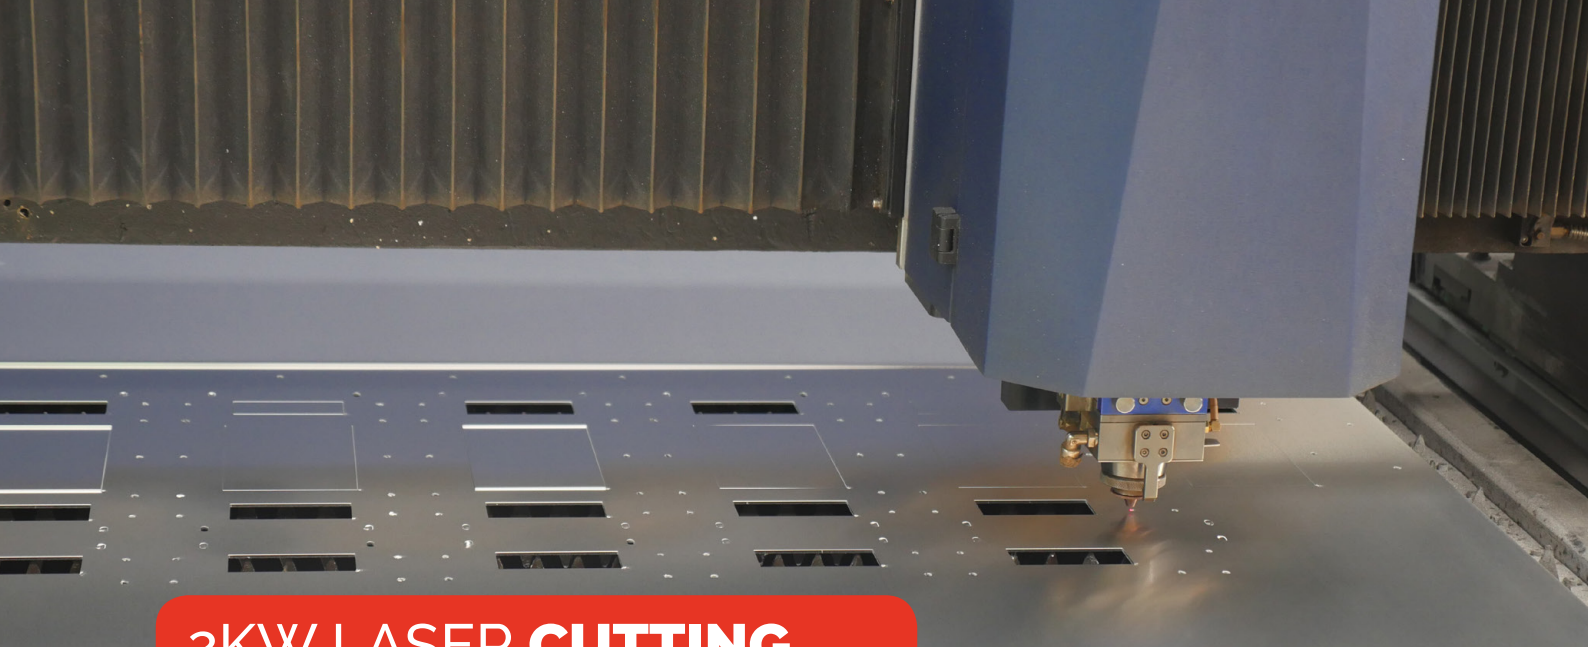

- Quick and easy
- Materials provided or BYO
- Full manufacturing capability
- Delivery available

NO JOB TOO BIG OR TOO SMALL

QUALITY SERVICE

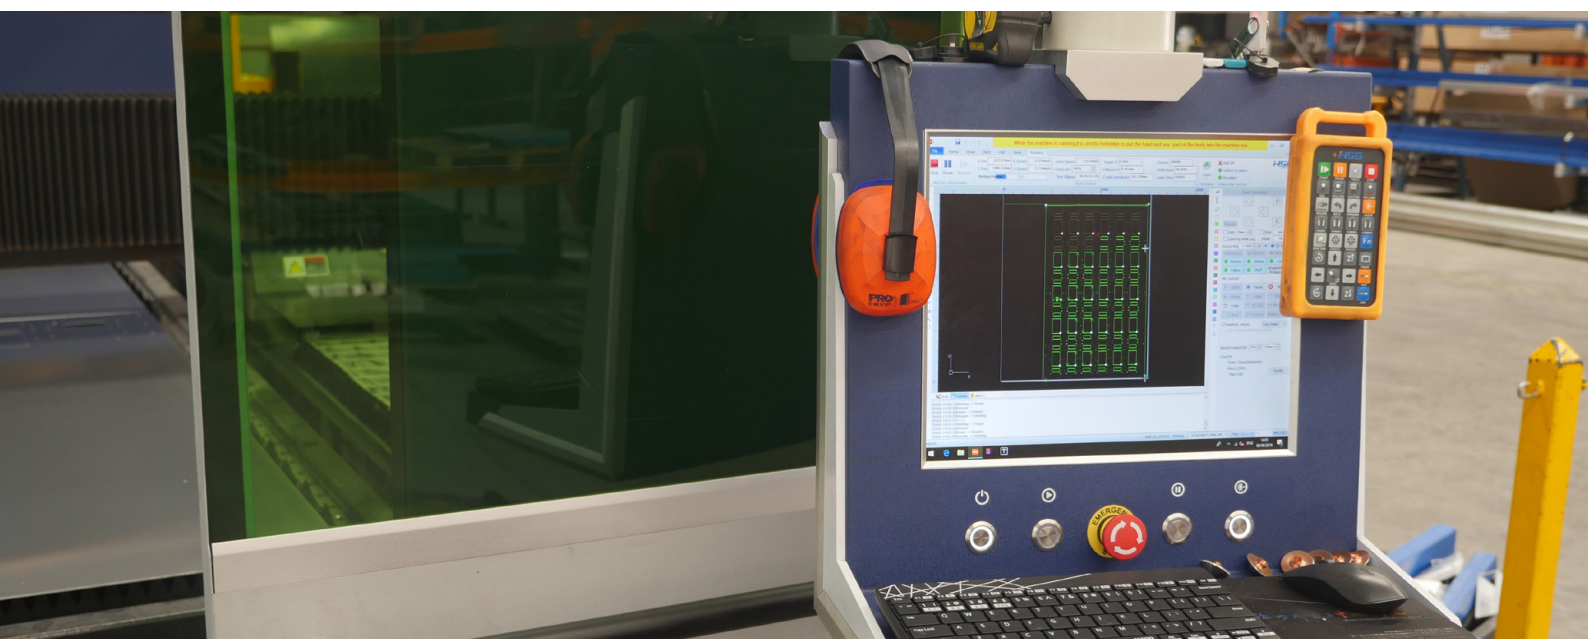

2KW LASER CUTTING

Laser cutters are used for cutting or etching flat-sheet material as well as structural and piping materials. The process creates edges with a high-quality surface finish.

SPECIFICATIONS

Work Area:	3000mm x 1500 mm
Maximum Speed:	60m/min
Maximum Acceleration:	0.5 G
Positioning Accuracy:	0.03 mm/m
Sheet Size:	3000mm x 1500mm
Additional Services Available:	Drawing
Materials:	Provided or BYO
Round Tube Cutting Capacity:	20-200mm
Square Tube Cutting Capacity:	20-150mm
Max Tube Length:	6m long

CNC ROUTER

The computer numerical control (CNC) router can be used in the production of many different items with consistent high quality etching or cutting no matter the quantity.

SPECIFICATIONS

Uses:	Etching, cutting
Sheet size:	3000mm x 1500mm
Additional services available:	Drawing
Materials:	Timber, aluminium, plastics
Maximum Rapid Traverse speed:	Over 3,000 inches per minute

100 TONNE BREAK PRESS

The 100 tonne break press can fold or bend steel and aluminium according to your needs.

SPECIFICATIONS

Capacity:	100 tonne / 981 kN
Uses:	Folding
Materials:	Steel, aluminium

CONTACT US WITH YOUR NEXT PROJECT

- 1 Discuss your manufacturing/fabrication needs with our friendly staff
- 2 Provide compatible drawings or have us draw it for you according to your specifications
- 3 Choose materials and quantity needed
- 4 Receive your finished product

"I was impressed with the accuracy and finish of the CNC work on my project. Good to deal with and the jobs completed on time as promised. Certainly would recommend you guys to anyone in need of quality CNC manufacturing processes."

Murray Henshall
